

Hikvision Temperature Screening Solution for Restaurant

HIKVISION®

Solution Introduction

The Solution is designed for the restaurant to take fast temperature screening and flow control applications and provide a safer and healthful environment for customers.

Skin-temperature based detection in high accuracy without surrounding interference; simultaneous temperature screening for up to 30 persons

Real-time people counting and triggering when customers number in the restaurant exceeds the limit

- ✓ Customer density monitoring
- ✓ Food promotion for restaurant

Solution Components

HD Temperature Screening Thermographic Camera

- AI detection, multiple targets detect at same time
- Video mode: Bi-spectrum image fusion
- accuracy: $\pm 0.5^{\circ}\text{C}$
- Flexible tripod or wall mounting

Dual-Lens People Counting Network Camera

- 3D binocular stereo vision and deep learning algorithm improve the accuracy of people counting
- Dual lenses colorful images, more real view and details
- Supporting filtering targets by height

Central Management Software

- Flexible, scalable, reliable and powerful central surveillance system.
- Supports live view, play back, people counting report, abnormal temperature alarm and people flow alarm..
